

# HEMP & CANNABIS HARVESTER

## BY WOLFCREEKWORKS

Efficiency gain - the HHH performs the work of up to 30 people

Significant throughput increase - processes up to 200 plants per hour or 10 lbs. of fresh flower per minute (genetics specific); can be used for dry flower bucking as well

Maximum flower and trichomes preservation - by utilizing patented flower stripping technology, minimum plant handling during harvest

Ideal for indoor and outdoor operations

## BIG. ON A BUDGET INTRODUCING THE HHH 850 C

HARVEST FOR LESS THAN  
\$0.10/lbs compared to up to  
\$2.40 using a traditional buckler

## WHY CHOOSE US?

With the innovative technology of the HHH, two people can de-bud up to 1000 plants per day. There's no breakage as the HHH can take the whole plant (specific to the genetics)

With the HHH it's guaranteed there's no damage to the bud, as the flower is never handled.
